ENTO Study Lab in Ukraine

Cities in transition – Moral and Physical regeneration & renovation

23-26 October, 2018

Slavutysh, Ukraine

Context

The European Network of Training Organizations (ENTO) has started organizing Study Labs in 2018. We are all aware that study tours can really give the chance to develop new knowledge and skills, but also networking and cooperation. ENTO has developed a special format – Study Lab - as real learning experience, as a example of active learning trough meeting public officials, discussing cutting-edge topics and learning through real-time experience.

2018 ENTO Study Lab in Slavutysh – Ukrainian youngest city - offers participants to visit and get in touch with people and places that are not otherwise accessible. Involving mayors, local officials, civic activists and academia gives participants unique opportunity. Opportunity to meet and see who/what is normally not meetable and visible
